

03/23/2020

The spread of COVID-19 continues to accelerate throughout the state of Connecticut. As of this time, there are 4 confirmed cases in the Town of Weston and we expect the number to continue to climb. While we cannot share names and addresses with you, we urge you to continue with social distancing. If anyone believes they have been exposed to someone who is confirmed COVID positive, stay home and self isolate. If you are experiencing symptoms, contact your primary care provider ASAP to obtain a prescription to be tested. As a reminder, the Westport Weston Health District will be conducting drive up testing at Bedford Middle School, 88 North Avenue in Westport starting tomorrow 8:30 am to 12:00 pm. The testing will occur on the following Tuesdays 03/24/20, 03/31/20 and 04/07/20.

We have learned through the latest press conference from Governor Lamont that he is recommending that schools are to be closed until April 20th at the earliest but this is not a firm date. Continue to work with the Weston Public Schools as they roll out the distance learning program.

We have seen many of our neighbors out for walks and enjoying our natural resources on our roads, fields and trails. With the increased pedestrian traffic we implore you all to please slow down while driving and use extra caution. The Nature Conservancy has decided to close Devil's Den Preserve effective immediately. For those who plan to hike at Trout Brook Valley, do not park on Bradley Road if the lot is full. It is imperative we are able to access all residences with emergency vehicles in an expedient fashion. For those who are using the facilities at our school complex, we ask that you are mindful of social distancing when congregating in the parking lots and on the fields.

Keep the faith during these trying times and know we are all in this together. This will certainly be a marathon, not a sprint. As time goes on, being patient, kind and neighborly will get us through this. Your support and cooperation are greatly appreciated!

#StayHomeStaySafe
